

Hospital Network Configuration Drift Sentinel - Executive Report

Generated on 2026-09-07 09:54:31 UTC | Classification: Internal Hospital Security Audit

1. Executive Summary

This executive report details the continuous network configuration drift sentinel audit across **10 hospital sites** and **111 active network infrastructure devices**. A total of **215 drift findings** were detected during automated baseline comparison. **215 findings** are unapproved or unauthorized, including **144 Critical** and **71 High** risk severity items requiring immediate remediation.

Metric	Count / Value	Security Significance
Total Sites Monitored	10	Distributed hospital campuses
Total Infrastructure Devices	111	Core, Firewall, Switch, Wireless
Total Drift Findings	215	Active configuration mismatches
Unauthorized Changes	215	No valid approved change ticket
CRITICAL Risk Findings	144	Immediate security exposure
HIGH Risk Findings	71	Compliance or segmentation risk

2. Critical & High Priority Drift Findings

Finding ID	Site	Device	Field	Severity	Auth Status	Risk
FND-2124-DEV	SITE-004	pharm-vpn-gate	guest_isolatio	CRITICAL	Mismatched T	75.7/100
FND-2124-DEV	SITE-004	pharm-firewall	guest_isolatio	CRITICAL	Expired Auth	75.7/100
FND-2124-DEV	SITE-001	main-switch-01	dhcp_snooping	CRITICAL	Expired Auth	76.4/100
FND-2124-DEV	SITE-007	peds-core-rout	telnet_enabled	CRITICAL	Mismatched T	80.0/100
FND-2124-DEV	SITE-001	main-vpn-gatew	dhcp_snooping	CRITICAL	Expired Auth	76.4/100
FND-2124-DEV	SITE-009	oncology-wirel	guest_isolatio	CRITICAL	Mismatched T	77.2/100
FND-2124-DEV	SITE-009	oncology-switc	telnet_enabled	CRITICAL	Mismatched T	79.3/100
FND-2124-DEV	SITE-001	main-wireless-	firewall_polic	CRITICAL	Expired Auth	80.9/100
FND-2124-DEV	SITE-006	research-vpn-g	telnet_enabled	CRITICAL	Expired Auth	77.0/100
FND-2124-DEV	SITE-004	pharm-vpn-gate	telnet_enabled	CRITICAL	Expired Auth	77.8/100
FND-2124-DEV	SITE-005	clinic-vpn-gat	firewall_polic	CRITICAL	Expired Auth	75.7/100
FND-2124-DEV	SITE-002	emergency-swit	telnet_enabled	CRITICAL	Expired Auth	80.8/100
FND-2124-DEV	SITE-006	research-edge-	firewall_polic	CRITICAL	Expired Auth	76.4/100

FND-2124-DEV	SITE-002	emergency-fire	telnet_enabled	CRITICAL	Expired Auth	80.8/100
FND-2124-DEV	SITE-009	oncology-iot-g	telnet_enabled	CRITICAL	Mismatched T	79.3/100

3. Governance & Remediation Mandate

All unauthorized drift findings must be investigated by Network Engineering and Security Operations. Remediation actions should be executed in accordance with hospital CAB change approval policies. Safe recommended remediation steps and CLI syntax are documented in the Sentinel Operations Console.
